Made from 100% recycled plastic waste.

Cost-effective pallet solutions- Reducing lifetime costs and logistics risks.

Reducing waste >

Our zero waste pallets are made from 100% waste plastic using Re>Pal's unique ThermoFusion™ technology process. Our pallets offer your business the performance and convenience of plastic while enabling your sustainability goals through leveraging the low energy, environmentally friendly and life-time cost-effective Re>Pal solution.

Re>Pal supplies its superior pallets across multiple industry types including large multi-national and domestic companies across, drinks & bottling, FMCG, manufacturing, electronics, chemicals and logistics - businesses interested in lowering their waste, energy and carbon footprint without compromising on quality or profitability.

Re>Pal™
Uniquely Sustainable

Pallet range for your logistics needs >
